**The Army of Squirrels is a novel by British writer Jonathan Stroud. It centers around Andrew Stone, a teenage squirrel with an unknown ancestry, and his wizard friend Max, a bat who tells the story through his gravelly voice. Named "The Army of Squirrels" for their "prodigious numbers", the squirrels are mostly descended from humans on the Isle of Greenspond in the past, who are hunted mercilessly and become increasingly comical as they try to cope with their new existence. Plot When he is very young, Andrew Stone is taken from his home in Devon and shipped off to the Isle of Greenspond in the Kingdom of Greenspine. His "Witch-Tree" Aunt Hester, who is in fact his mother, faints upon seeing him the first time they meet. Having been born the year of The Worldstorm, a powerful force which causes massive and sudden floods every 30 years, the humans who live in Greenspond have had a lot of experience coping with brief, but violent, periods of climate upheaval. The events which**

After several months, Andrew and Hester meet a farmer and his wife who take Andrew in and name him Andrew Stone, because they expect he will return home when his mother dies. Hester tells Andrew that the Greensponders, unlike most other humans, worship the Sleeping King. She explains that the children are taken from the nest when they are small and educated in what we would call witchcraft. They are taught that their mothers and other family members are real enough, but that they only talk to their priests and teachers. They are trained to be able to predict terrible events like The Worldstorm, but that predictions also include pleasant happenings that the priest believes in. In the meantime, Aunt Hester, too, journeys to the Isle of Greenspine. When Andrew visits her in the greenspines, he discovers that the environment has taken her back to the past. She explains that in her past life she was a member of the Farming Guild, a group supposedly dedicated to avoiding the worldstorm. She was a good witch and was under oath to carry on the ways of her people, especially their grim determination to minimize damage to the environment. Now, she explains, she must deal with the consequences of the unseen institution called The Prince, who decrees that she is a criminal and**

**Revolver has announced new details about its 6th game, making it the second game in the series to be revealed outside of the Survival First Person Perspective genre (Submerged and Farcry 2), following the lackluster sales of the last game. This time, it's focusing on a very popular genre, and the game will feature a prehistoric setting. The game will feature realistic physics, such as leaning motions, and the ability to use weapons on people, encouraging players to use them. Revolver expects to release the game in early 2015. In-game screenshots and artwork were also released. Revolver CEO Jeff Nordhaus stated that the idea of the game stems from the way players think of the game, stating: "Survival is all**
