Injecting SWFs and FLVs for malicious purposes, user controls (CUE files) which may be used to... "Brokepony", a Windows application to scan and remove infected files from a Windows computer. The program scans the target computer in stealth mode. NOTE - To reinstall the program please download the Windows 7 Activation Key below. If you are installing on Windows Vista, please download Vista Activation Key below. "Brokepony" is an extremely easy to use tool that does an excellent job of finding and deleting files that are infected with virus' or other malicious software. "Brokepony" is the only tool I've seen that can search for and remove the "Live Fax Worm" that has been stealing your faxes since 2002. The software allows you to set a quarantine, restore the reputation of the machine, check the quarantine, and then remove the quarantine as soon as the files you wanted to quarantine are gone.
