The Apple Pencil won't work as expected. You won't be able to erase. So, while you can highlight and navigate around the layer hierarchy in sketch mode, anything you delete will be irretrievable. Without a stylus, erasing is simply impossible. You can draw on the canvas only in the layer you've selected. Font text behaves normally. If you double tap in the target area, the cursor disappears and you begin writing. If you change your mind and want to use the Apple Pencil as a mouse pointer, it's a very awkward experience, like drawing with a magic marker. In sketches, you can only draw a complete outline or uppercase and lowercase text. I'm not entirely sure why the digitizer's cursor can be a little bit more accurate than the fingers, but it is. Apple has been keeping secret the exact resolution of the company's what they call its "Magic Mouse 2," which is connected to the new MacBook Pro. But press reports indicate Apple's new Magic Mouse is about 10 megapixels as opposed to 12 mega pixels in the older and far more popular Magic Mouse. At the same time, a new Time Capsule is available, with up to a terabyte of storage. Pixel / pixel to weight conversion is done in the Canvas → Color

Adjustments → Convert to Grayscale command. There are some limitations to learning from tutorials against a background image. On a web blog template, you can only utilize one background pattern for the whole template. I created a second background and used that instead.

Another incredibly powerful feature Adobe Photoshop has introduced in its new program is "Smart Guides." These are essentially a virtual on-screen guide to help you paint the image you want as precisely as you want to. With Smart Guides, you can create precise guides for your image. These guides will disappear if you move the image within the canvas, but will reappear if you move the image by dragging the image outside of the canvas. With the new guides, you can create those precise lines you need to create precise images without the need to actually create the precise lines – something previous versions of Photoshop had great difficulty attuning to. It has been an uneven year for Barack Obama. Opinions are still mixed on whether he has been a good president so far, but there is no question that he is the most talked-about American politician of the year. Announcing the policy on Tuesday, the Independent Review Group suggested that the UK should not automatically give someone a high security risk verdict just for having travelled to Pakistan. "The common factor we found between those who had travelled from Pakistan was their circumstances, and particularly their mental health problems, whilst overseas," the three investigators, who spoke with hundreds of people detailed in the report, said. "It's not just that they are detained but it's how they are treated in detention that matters," he said. "The detention centres are not places of reform, but places of punishment and dehumanisation, with the power to abuse and humiliate detainees."

The Independent Review Group's recommendations include:

- Government-appointed commissioners should interrogate British citizens and dual UK-US citizens for their potential "non-cooperation" with the US. These interrogations should take place in a non-judicial setting, the group said.
- The Home Office should not automatically extradite people

on the grounds that they can face torture overseas, the report added. • A review should be conducted of the way British citizens are arrested and interrogated under anti-terrorism laws, the report said. • People who had been detained but not charged should be given access to legal advice and information as to their rights, the report said. • Victims of torture, abuse and human rights violations should be compensated by the state, the report added. Ahmed Ali Abassi, a British widow with Iraqi citizenship, is detained in London. Photo: AP Plans to bring back British-born terror suspect Ahmed Ali Abassi were called off on Tuesday. Whitehall officials were said to be torn between an 'overzealous' desire to bring the legal proceedings to an early conclusion and a wish to keep Abassi's detention secret at all costs. Mr Abassi was detained along with a Belfast man - understood to be Seamas Connolly, who worked as a salesman for RAF Boulmer - and a 20-year-old from London, Vincent Cassidy, after seven Sri Lankan seamen were stabbed at a unit in Cyprus in December. Abassi has reportedly confessed to his role in the ship incident, as well as to a series of attacks on the Israeli embassy in London and the Jewish centre in Nottingham. The Sri Lankan sailors were injured with meat cleavers at Colombo's Colombo Port and the Israeli embassy in London was once again attacked this week. A British national died on Sunday after being in in clashes in Baghdad between Iraqi security forces and Sunni militants. Last week, US authorities claimed that Abassi, 27, was planning to return to the UK to join Al Qaeda in its battle against the West. The Independent Review Group (IRG) said the outcome of the Abu Ghraib case should give the Home Secretary, Sir Charles Clarke, no option but to release him.
